

## EMPLOYEE HEALTH – IMMUNIZATION

### Influenza Vaccine

Influenza vaccine will be available to all:

- MUSTARDSEED HEALTH CARE SERVICES employees annually in the fall. A notice is sent to inform staff when the vaccine is available.

### Measles Vaccine, Rubella Vaccine, Polio Vaccine

- Not generally available, but is considered on an individual basis, if at risk or in contact with infected patients.

### Tetanus/Toxoid

- Is offered for work-related injuries.

O.S.H.A regulation states that all health care professionals with occupational exposure to blood borne pathogens must be offered with hepatitis B vaccinations. You have been determined to be at risk to blood borne pathogens.

I have already received the hepatitis B vaccine

I decline the hepatitis B vaccine

If interested with the hepatitis B vaccine, I may contact the Frederick or Washington County Health Department.

I understand that due to my occupational exposure to blood borne or other potentially infectious material I may be at risk of acquiring hepatitis B virus (HBV) infection.

I have been given the opportunity to be vaccinated with the hepatitis B vaccine. However I decline hepatitis B vaccination at this time.

I understand that by declining this vaccine, I continue to be at risk of acquiring hepatitis B, a serious disease.

If in the future I continue to have occupation exposure to blood or other potentially infectious materials and I want to be vaccinated with hepatitis B vaccine; I can receive the vaccination series.
